

Covansys Technologies LLC

A Trusted Partner in Wireless Network & IT Security Solutions

About Covansys

The Demand for high bandwidth and stable reliable connectivity is on the rise. Enterprises are faced with challenge of meeting demand while remaining cost effective. We understand the market and have the ability to offer differentiated services at lower costs, which is the key to gaining and retaining customers...

Covansys Wireless Solutions combine wireless access technology with gateways to extend the functionality and reach of existing IP networks and legacy technology. It ' s all part of how we deliver the promise of “ Intelligence in the Air ” .

Covansys Automations Solutions combines the complete ELV and IT Monitoring System Which includes CCTV, Access Control System, Fire Alarm System, Public Address, Lighting Control System, Parking & Space Management System which can also be integrated with Intruder Alarming system and Gate fencing System.

Covansys Security Solutions combine the complete range of EL systems like CCTV, Access Control, FAS, PAS, PMS. And Commercial Security Solutions like Queue Management System, Visitor Management System

ISO 9001-2008 Certified Company

OUR PRIDE

We recognize that every customer is unique, with their own individual needs and wants. We are dedicated to working with our customers to understand what's most important to them, and then working hard to provide a services.

What we do

Wireless and Network Monitoring Solution:

In-house Wi-Fi Expansion.
Point to Point Network Solution.
Point to Multi Point Network Solution.
GSM Gateway Solutions.
IT Network Monitoring Solution.

Electronic Security Solution:

CCTV, Access Control, Public Address.
Parking Management and Space management System.
Speed gates and Turnstile Access Control System.
Long Range UHF Access Control Solution.
Building Monitoring System.

Commercial Security Solution:

Queue Management System.
Visitor Management and Tracking System.

In-house Wi-Fi Expansion.

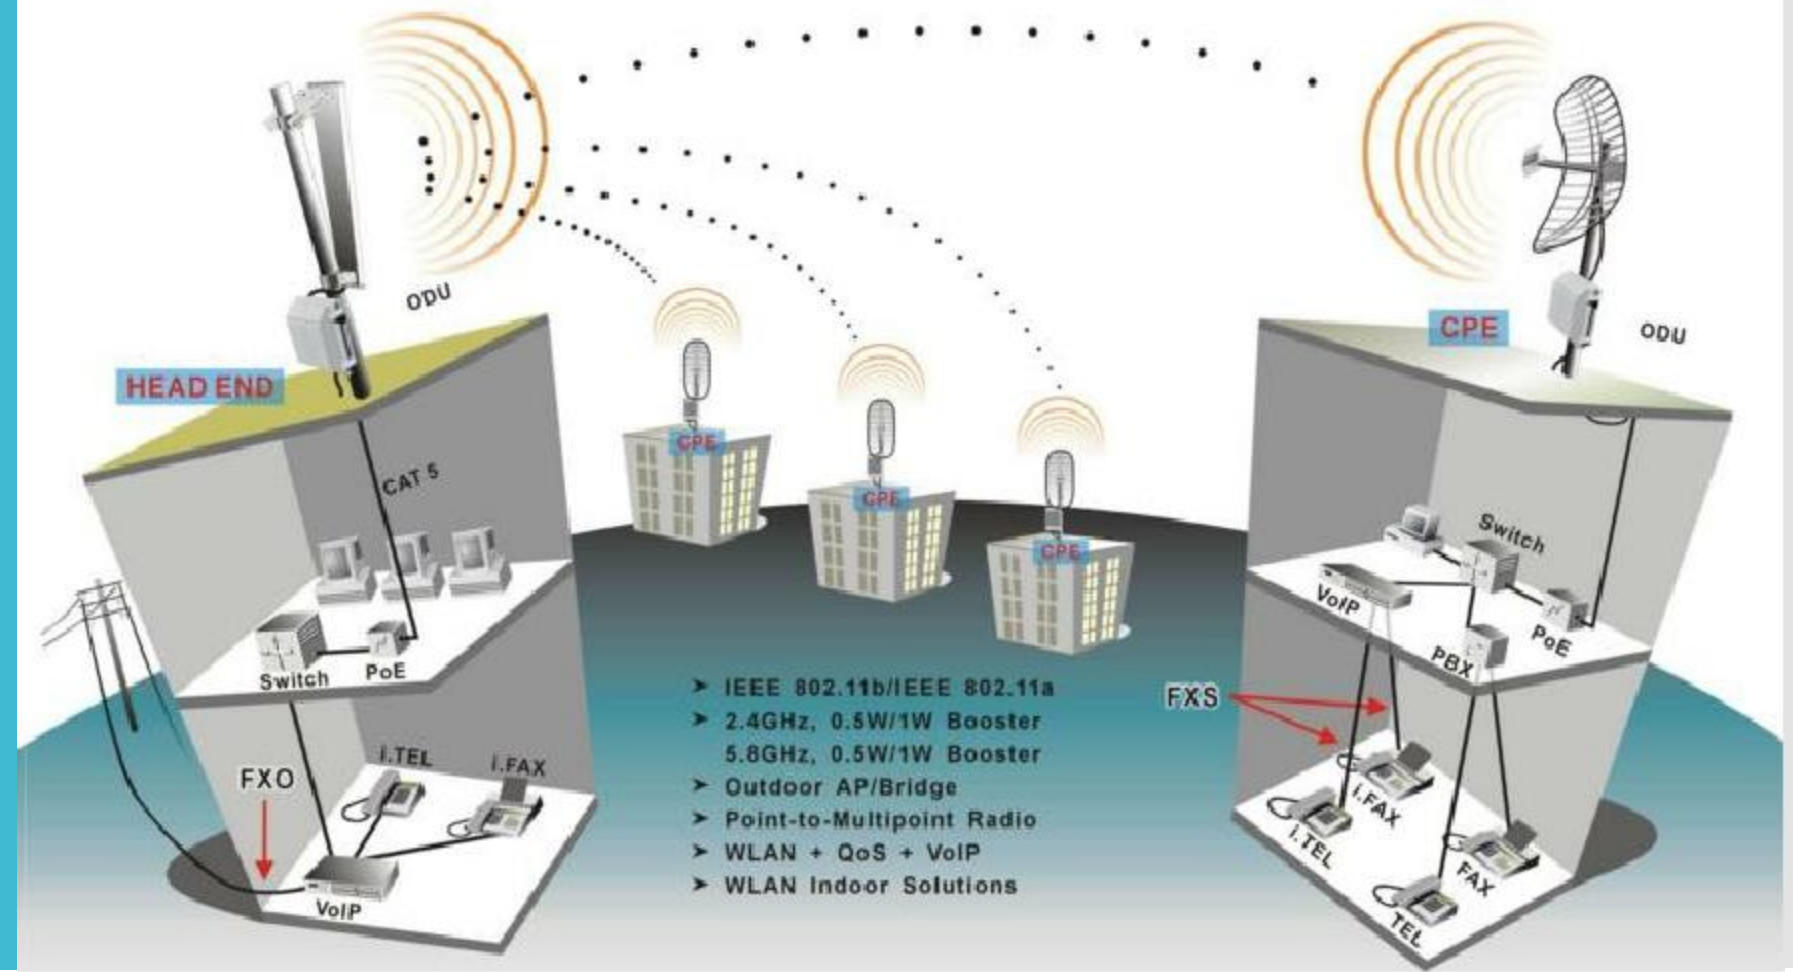

Hotel Wi-Fi - seamless Wi-Fi coverage with software integration, Our AP with smoke detector appearance, it minimizes visibility for any type public areas, such as Lounge, Corridors, , restaurant, coffee shop..etc..

Wireless Point to Point

Point to Multi Point Network Solution.

Electronic Security Solution

Closed Circuit Television:

- Analogue Solutions.
- IP Solutions.
- People Counting System.
- Car Number plate Recognition

Access Control System:

- Bio-Metric, Keypad and Card Based.
- Tripod Turnstile & Speed gates
- Hotel Access Locks and Handle integrated.

Public Address System:

- Conventional PAS.
- Addressable PAS.
- Talkback System.

- Parking Management and Space management.
- Long Range UHF Access Control Solution.

Speed gates and Turnstile Access Control System.

Parking System

Commercial Security

Visitor Management and Tracking System.

Queue Management System.

Centralized Monitoring & Control

Your control room is the central intelligence point for managing and evaluating a wide range of monitoring and control equipment. Response to either minor or critical events is very dependent upon the experience and knowledge of your operator. **Encountering problems within your control room?**

- Training is experience dependent
- Information is spread across different systems
- Incident and response can be open to interpretation

Covansys integrated software management system delivers an effective solution:

- Identifies and verifies information while assisting with incident control and events in an organized manner
- One operating routine for all systems makes it easier for operators to understand events, respond and direct resources effectively
- A single database for all systems ensures operational accountability, greater management control and a full audit trail of events
- Response to events can be pre-determined with video verification and on-line help instruction.

A single operating platform for all your manufacturers control equipment like: intruder, perimeter, building alarms, staff safety, CCTV, fire, access, Building Parking Management.

Building Monitoring System.

Covansys Energy and BMS Modules can be linked dynamically to any existing integration you have for security and fire control room equipment, as a single operating and reporting platform with just one database. Key features include :-

- Intelligent Metering – real time events and comprehensive reporting
- Display Meter readings – online hosting includes monitoring, analysis reporting and reviews.
- Set thresholds for power, temperature and water usage
- Switch outputs for sounders, lights & display

The solution, with its clear and intuitive graphical locations, allows operators to respond efficiently to all alerts and events with a pre-determined response requirement for:-

- Critical building alarm events
- Temperature/humidity monitoring
- Plant and control systems
- Binary input/outputs
- Analogue input/outputs
